Topographic sheets

NOTE.—These maps, here issued separately, appear again in the folios of the Geologic Atlas, and also serve as bases of the geologic maps. They are successive steps in the topographic mapping of the whole United States. Each sheet covers a quadrangular section of country bounded by parallels and meridians, and is named from some prominent feature of the section. The scales used, 1:62,500, 1:125,000, 1:250,000, correspond approximately to 1 mile, 2 miles, and 4 miles to the linear inch. The width, always given second, varies with the latitude from 11½ to 16 inches. A description of the topographic map is printed on the reverse of each sheet, unless otherwise stated.
